UV-Vis Spectroscopy: Export Your Measurement Out of the Instrument

LIVE WEBCAST

Thursday, September 12, 2024

English Session:
10:00 AM BST | 11:00 AM CEST

French Session:
10:00 AM BST | 11:00 AM CEST

Presenters

Marcus Schulz, PhD
Application Engineer
Agilent Technologies

Caroline Perier
Molecular Spectroscopy Product Specialist
Agilent Technologies

Oliver Mandal, PhD
Product Manager Sample Interfaces
Hellma GmbH & Co. KG

Sylvain Joigneau
Technical Sales Engineer
Hellma France

Moderator

Shannon Stolz
Senior Editor of Special Projects
Spectroscopy®

Event Overview

In this webinar in partnership with Hellma, attendees will learn how optical fibers integrated with UV-Vis spectrometers function and how the capabilities of such systems can be leveraged. Experts and participants will discuss how the individual components of a fiber optic system influence overall performance. Additionally, application examples to illustrate the practical benefits of these technologies will be provided.

Key Learning Objectives

- Understand the benefits of fiber optics
- Gain technical insights into fiber optic technology
- Explore practical application examples

Who Should Attend

- Academia: Research scientists, students, teacher
- Industry: Laboratory manager, laboratory technician

Sponsored by

Agilent
